Encore une autre fiche eudravigilance manquante ! Une fillette de 7 ans qui a fait un accident vasculaire cérébral et une paralysie faciale après vaccination Pfizer, cas rapporté par Pfizer eux-mêmes... le rapport s'est envolé.

Cette fiche là n'a pas été expurgée du système, mais elle y figure maintenant sans aucune mention de l'âge (tous les âges ont été effacés de toutes les fiches il est vrai), ni même, plus étonnant (ou pas vraiment, en fait), du groupe d'âge, qu'il fallait ici escamoter.
